

CECW-ED

Manual
No. 1110-2-2504

31 March 1994

**Engineering and Design
DESIGN OF SHEET PILE WALLS**

Table of Contents

Subject	Paragraph	Page	Subject	Paragraph	Page
Chapter 1					
Introduction					
Purpose	1-1	1-1	Earth Pressures	4-2	4-1
Applicability	1-2	1-1	Earth Pressure Calculations	4-3	4-3
References, Bibliographical and Related Material	1-3	1-1	Surcharge Loads	4-4	4-5
Scope	1-4	1-1	Water Loads	4-5	4-6
Definitions	1-5	1-1	Additional Applied Loads	4-6	4-6
 Chapter 2			 Chapter 5		
General Considerations			System Stability		
Coordination	2-1	2-1	Modes of Failure	5-1	5-1
Alignment Selection	2-2	2-1	Design for Rotational Stability	5-2	5-1
Geotechnical Considerations	2-3	2-2	 Chapter 6		
Structural Considerations	2-4	2-2	Structural Design		
Construction	2-5	2-3	Forces for Design	6-1	6-1
Postconstruction Architectural Treatment and Landscaping	2-6	2-8	Deflections	6-2	6-1
 Chapter 3			Design of Sheet Piling	6-3	6-1
Geotechnical Investigation			 Chapter 7		
Planning the Investigation	3-1	3-1	Soil-Structure Interaction Analysis		
Subsurface Exploration and Site Characterization	3-2	3-1	Introduction	7-1	7-1
Testing of Foundation Materials	3-3	3-1	Soil-Structure Interaction Method	7-2	7-1
In Situ Testing of Foundation Materials	3-4	3-5	Preliminary Information	7-3	7-1
Design Strength Selection	3-5	3-8	SSI Model	7-4	7-1
 Chapter 4			Nonlinear Soil Springs	7-5	7-1
System Loads			Nonlinear Anchor Springs	7-6	7-3
General	4-1	4-1	Application of SSI Analysis	7-7	7-4
 Chapter 8			 Chapter 8		
			Engineering Considerations for Construction		
			General	8-1	8-1
			Site Conditions	8-2	8-1

Subject	Paragraph	Page	Subject	Paragraph	Page
Construction Sequence	8-3	8-1	Corrosion	9-2	9-1
Earthwork	8-4	8-1	Liquefaction Potential During		
Equipment and Accessories	8-5	8-1	Driving	9-3	9-1
Storage and Handling	8-6	8-2	Settlement	9-4	9-2
Methods of Installation	8-7	8-2	Transition Sections	9-5	9-3
Driveability of Sheet Piling	8-8	8-2	Utility Crossings	9-6	9-8
Tolerances	8-9	8-3	Periodic Inspections	9-7	9-8
Anchors	8-10	8-3	Maintenance and Rehabilitation	9-8	9-8
			Instrumentation	9-9	9-8

Chapter 9

Special Design Considerations

I-Walls of Varying Thickness	9-1	9-1
